

ASPIRE Survey

The purpose of this document is to provide comparisons of salaries based on several key program and individual characteristics. For the overall salary and for each comparison, results include the mean, median, minimum and maximum. In addition, the frequency and percent of each value is included; note that the percent column is based on the overall number of responses in that category, while the valid percent is based on the number of valid responses (i.e., excluding missing values). Some categories include very few responses; these results in particular should be shared with care.
